

## Sal Wanying Fu

---

CONTACT INFORMATION	Email: wanying.fu@pomona.edu Website: <a href="http://swfu.github.io">http://swfu.github.io</a> ORCID: <a href="https://orcid.org/0000-0003-2990-0830">https://orcid.org/0000-0003-2990-0830</a>	
RESEARCH INTERESTS	Near-field cosmology, satellite galaxies, Galactic dynamics, stellar streams, stellar halos, chemical evolution, large surveys	
EDUCATION	<b>B.A. Physics, Pomona College</b> , Claremont, CA Current GPA: 3.88	Expected May 2019
RESEARCH EXPERIENCE	<b>Observatories of the Carnegie Institution for Science</b> Undergraduate Research Fellow Advised by: Dr. Josh Simon, Dr. Gwen Rudie	Jun 2016-Present
	<i>The Dynamical Histories of the Crater II and Hercules Dwarf Galaxies</i>	May 2018-Present
	Used optical spectroscopy from the Magellan/IMACS spectrograph to model chemodynamics of Cra II dwarf galaxy. Inferred dynamical histories of Cra II and Herc to test tidal disruption hypotheses surrounding the two dwarf galaxies. Manuscript is currently in preparation. Work will be presented at AAS meeting in Jan 2019.	
	<i>The Origin and Classification of the Sgr II Satellite</i>	Apr 2018-Present
	Used optical spectroscopy from the Magellan/IMACS spectrograph to determine dark matter content and metallicity dispersion of Sgr II satellite. Used high-resolution optical spectroscopy from the Magellan/MIKE spectrograph to infer chemical abundance patterns of Sgr II members. Modeled orbit of satellite to infer possible origin. Work will be presented at AAS meeting in Jan 2019.	
	<i>The Origin of the 300 km/s Stream Near Segue 1</i>	Jun 2017-Aug 2018
	Identified new members of the 300S stream in APOGEE-2 and SEGUE survey data. Used dynamical modeling techniques and chemical abundance analysis to infer the origin of the stellar stream. Work culminated in paper publication and AAS iPoster presentation.	
	<i>Chemical Abundances of UMi dSph in APOGEE-2</i>	Jun 2016-Aug 2016
	Identified systematic velocity variation in timeseries velocity data of faint stars from APOGEE-2 proto-DR14 dataset. Work culminated in AAS poster presentation.	
	<b>Pomona College Department of Physics and Astronomy</b> Undergraduate Research Assistant Advised by: Prof. Philip Choi	Jan 2016-May 2016
	<i>Searching for NEOs Using Synthetic Tracking</i>	Jan 2016-May 2016
	Assisted remote observing program using the 1-meter telescope at Table Mountain Observatory to search for faint, near-earth asteroids.
